Installation guide –

Do not bend
For indoor use only
For inside of Front, Rear or side windows

1. Ensure surface is clean & free from dust, grime, grease etc...
2. Spray water with mild detergent solution onto area for fitting. This will allow you time to move decal into correct position.
3. Peel clear protective layer from front of decal.
4. Start from one side, begin to stick down slowly smoothing out with a squeegee as you go to remove air bubbles.
5. Wipe all excess water from decal.
6. **Decal must be totally dry before use**
7. Position Driver box under seat or dash area.
8. Run wires, concealing in roof lining, door trims, under carpets etc....
9. Use either 4m or 2m extension cables if needed.
10. Connect cables to decal and driver box.
11. Plug in Cigarette lighter plug and lead into driver unit and power socket.
12. Turn on Car power, Switch Driver unit to ON.
13. When sign is running select desired pattern with pattern button.
